PROFESSIONAL SUMMARY

I'm IT Support less than one year of hands-on experience in providing technical support and maintaining IT infrastructure to ensure smooth and uninterrupted business operations. My role included troubleshooting network connectivity issues, diagnosing and resolving internet disruptions, and optimizing network performance to minimize downtime. I was also in charge of installing, configuring, and maintaining CCTV systems, including camera setup, DVR/NVR configuration, system monitoring, and routine preventive maintenance to ensure reliable surveillance operations. In addition, I handled software and hardware maintenance for PCs and workstations, such as operating system installation, driver updates, application troubleshooting, virus removal, hardware upgrades (RAM, HDD/SSD), and replacement of faulty components. I provided both on-site and remote technical support to end users, delivered clear technical guidance, and ensured issues were resolved efficiently to maintain productivity. Through this experience, I strengthened my analytical thinking, problem-solving abilities, adaptability, and ability to work under pressure, while continuously improving my technical skills to stay aligned with evolving technology trends.
